

M.L.A.'s to Handle Registration

Registration of Alberta residents as the first step towards payment of basic dividends will be handled by members of the legislature for each constituency by methods best adapted to the various ridings, announced Premier Aberhart at Edmonton on Tuesday.

The members will be setting up registration centres throughout the constituencies for the registration, expected to be completed by the end of August, he said.

At each centre assistance of citizens capable of taking registration will be needed by the members, the premier stated. Ridings represented in the legislature by opposition members, such as Grouard, possibly will be handled by Social Credit members of the House of Commons.

Mr. Aberhart said registration forms, still under consideration by the government, would be sent out shortly to the members.

Because some constituencies were extensive, with residents widely scattered, while others, such as the cities, were concentrated, different systems of completing registration would be used by the various members.

Rural Anxiety.

No word you spoke at parting time;
Soft were your eyes of brown.
As silken-clad the path sublime
You took and started down.

Nor turned to bid a last goodbye.
For me you scorned a care,
But slowly faded from my eye
And left me standing there.

Return, my gentle one, return!
Ere light and darkness meet.
Beside the gate I stand and yearn
Your presence here to greet.

Oh, joy! At last your voice I hear.
Nor did I wait in vain.
Come, hustle up, you lazy dear—
It's milking time again!

—L. W.

Obituary.

Mrs. C. C. RINEHART

The sudden death from heart failure of Mrs. C. C. Rinehart was returning from the cow pasture when she suffered her attack and died almost instantly.

Forty-nine years of age when she died, Mary Herner was born near Cullom, Illinois, August 19, 1887. With her parents and the family, she moved to a farm west of Carstairs in 1902. In 1910 she was married to C. C. Rinehart of Westcott.

Mrs. Rinehart is survived by her husband; her mother, Mrs. J. E. Wamsley; three brothers: Samuel Herner of Denver Col., John and Lawrence Herner of Garfield Alta. and one sister, Mrs. E. Goudie of Didsbury.

The funeral was held Wednesday from the Mennonite Church with Rev. C. J. Hallman and Rev. F. Vincett officiating. Funeral arrangements were in the hands of W. S. Durrer and interment was in the Didsbury Cemetery.

Mrs. PEARY THOMPSON.

The funeral of Mrs. Peary Thompson, who died at Dovercourt near Rocky Mountain House on July 21, took place at the M.B.C. Church on Saturday afternoon. Rev. F. Vincett assisted by Rev. A. S. Caughell and Rev. A. Traub conducted the services.

Celestine Annie Thompson was born in Hawkesville, Ontario, December 17, 1903 and departed this life from her home July 21, 1936 at the age of 32 years, 7 months and 4 days.

The deceased came with her parents from Ontario to Alberta in the year 1915, residing at Sugden until 1930, after which she moved with her parents to Didsbury. In 1933 she graduated from Mountain View Bible School and on October 26, 1934 she was united in marriage to Mr. Peary William Thompson. After his graduation from Bible School in year 1935, they were assigned the Dovercourt Appointment where they were located at the time of her death.

Our sister was converted early in life and remained true to her Lord since that time. Later she joined the M.B.C. Church and had ever been a loyal member, always doing faithfully what she could for her Lord. She died in the triumphs of the Christian faith.

Besides the many friends who had learned to love her, she leaves to mourn her loss her sorrowing husband; her aged father and mother, Mr. and Mrs. F. S. Spies, of Didsbury; two brothers, Reuben of Vegreville, Alta. and Herbert of Sugden, Alta. and three sisters: Mrs. Frank Clarke of St. Lina, Alta., Mrs. Eli Diefenbacher of New Dundee, Ontario and Miss Mildred Spies of Stratford, Ontario.

WEDDINGS

ARCHER—REIST

A quiet wedding took place at the M.B.C. Parsonage on Saturday, July 25, when Miss Dorothy, daughter of Mr. and Mrs. Theo Reist, was united in marriage to Mr. Crosby Archer, Rev. F. Vincett performing the ceremony. Only immediate relatives were present.

The happy couple left the same evening for Vancouver and Washington where they will spend their honeymoon.

Splendid Exhibits at Didsbury Fair.

That the Didsbury District has some of the best livestock in the Province, was amply brought out at the Exhibition at the Butte this Wednesday.

There were 125 entries in horse classes and 110 in the cattle classes. The quality of the exhibits brought complimentary remarks from the judges. There was also a goodly number of hog and sheep classes.

The inside exhibits while not as large as in earlier years, were a big improvement on the past two fairs, and it would appear that the ladies are again taking interest in the exhibition. There was a very good exhibit in the school section and some very good work was shown.

In the Calf Club Exhibition, held in connection with the Fair, there were about 40 entries, the young folk showing the results of the work they had done in the past three years of their existence as a club.

The attendance was the largest in years and fully 1,200 people passed through the gates.

The judges of the various classes were:

Horses: Mr. Maxwell Smith, of Calgary.

Cattle and hogs: Mr. Vic, Bjorkland, of Red Deer.

Poultry: Mr. R. A. Gulliver.

Grains and Grasses: Mr. William Thurlow.

Fancy Work: Mrs. McGhee and Mrs. R. Lantz.

Domestic Science: Mrs. Russell Berscht, Mrs. H. Halliday and Mrs. Morrow.

Bread: Mr. J. Russell.

Art, Manual Training, School Work and Flowers: Mrs. Eva Hopkins and Mrs. Harold Reiber, of Los Angeles.

Race fans were treated to some excellent races during the afternoon when in the 2.28 harness race, H. Gillrie of Morrin, won the big money with Ross, of Hanna, second, A. Gillrie, Morrin, third and J. Caithness fourth. The three heats of this race were closely contested with Gillrie having just a slight edge over the fast Hanna entry.

The half mile open saw Graham, of Olds take first money with young Ralph Edwards riding the winner. W. Fulkerth was second and G. Fulkerth third.

Al. Cook copped first in the 14.2 half mile running race. J. Johnson was second and D. Johnson third.

In the green race, farmers trot, Jack Ady won, with Dave Sinclair a close second and Weigand third.

Judges for the races were Messrs. McCulloch and Anthony, Calgary, George Haag, Carstairs, and J. E. Moffatt, Didsbury.

The football game at the Butte saw Bowden have an easy time beating the local eleven 5 to 1. Bowden showed far too much polish and finish around the goal, while Didsbury players continuously failed to cover their man.

The local Flashes had a real practice at the expense of the Three Hills Softball team in the other sports fixture. The game was so one sided that it developed into a burlesque with the Flashes winning 29-5. All the locals took a turn pitching and all had equal success in baffling the visiting batters.

Staging a sixth inning rally that netted them six runs, Didsbury overcame a 4-run deficit and emerged on the long end of a 13-9 score against Cremona in the final sports event Wednesday night. L. Berscht started the fireworks in the sixth when he doubled into right field and scored on Tuggle's single. R. Gulliver scored Tuggle with a long hit through short for three bases and gave Didsbury the lead for the first time when he was sacrificed home by Ward Wyman. Tittsworth flied out to right field. Hit by the pitcher, Geiger stole second and third and scored on a single by Black. Schuler

Drivers' License Check-Up Sought

Stating that it is considered ample time has been allowed drivers of automobiles to purchase their drivers' licenses, in the opinion of the department, a letter has been received by Calgary City Police headquarters over the signature of J. C. Tebb, of the deputy provincial secretary's office, asking the police to institute an intensive check-up on unlicensed drivers.

Provincial Forest Reserves Closed.

Faced with one of the most serious fire hazards in many years, provincial forest reserves ranging from the Waterton Lakes to the height of land on the Red Deer and Clearwater rivers, will be closed to the public until further notice, J. P. Alexander, superintendent of the Crownst and Bow River forest reserve, announced last week.

Conditions in practically every part of the Crownst, Bow River and Clearwater timber reserves are drier than he has ever known. Mr. Alexander stated. Dwindling water supplies add to the difficulties of fighting a blaze. Hundreds of fishermen and campers in these districts increase the dangers of fire being started.

Penalties under the Act for illegally entering a forest reserve are heavy. How long the ban will be enforced depends entirely on climatic conditions, as heavy and continued rain will be necessary before the existing menace is removed.

Mr. Milo Clemens was seen on the street this week with his daughter, grand-daughter and great grand-daughter. They are visiting here from Washington and California.

got a double, and H. Gulliver and L. Berscht both singled to score two more runs and clinch the game, as Cremona were retired in 1, 2, 3 order in the seventh and final frame.

Ray Stouffer pitched the first four innings for Didsbury, with Mike Schuler finishing the last three. For Cremona, Trones went five sessions, being relieved by Atkins.

Memorial Day Service Sunday, Aug. 2, 4 p.m.

The Didsbury Branch of the Canadian Legion will hold their Annual Memorial Service, in honor of the men of Didsbury district who fell in the Great War, at the Cenotaph on the Butte, Sunday, Aug. 2, at 4 p.m.

Returned men will meet at the Legion Hall and parade to the Butte. The service will be conducted by Comrade Rev. N. W. Whitmore, of Olds, who is a returned man and a member of the Canadian Legion.

Memorial wreaths will be laid on the cairn by the Canadian Legion, the I.O.O.F. and the general public.

Government Roadwork Started Last Week

Payment to be Made in Prosperity Certificates at end of Month

The provincial government's 'Prosperity Bond' roadwork project is slated to start today (Thursday) at the Y west of Olds.

The work of conditioning the east section will be done by 8 freemen and about 10 4 horse teams. It is expected that at the peak of operations about 20 single men will be employed. The following is the wage scale: 40c per hour for single man, 60c per hour for man and team, 80c per hour for man and four horses, all to be paid in Prosperity Bonds, which will probably be issued by the end of the month.

W. McDermid, who is well acquainted with projects of this type, will be in charge.

In view of the above work being done and providing the payment scheme is a success, it is possible this road may be gravelled in the near future — Olds Gazette.

Tourist Trade Revenue

It would appear that provincial governments of the prairie provinces which neglect to spend sufficient money to maintain their highways in good condition are overlooking a good bet, if figures of tourist traffic from the other side of the international boundary into Canada are an index of what might be expected if highways were made attractive enough to draw the quota of this windfall which the western provinces might reasonably expect.

Recently published figures show that tourists entering Canada in 1935, most of them from the United States, were responsible for a total expenditure of \$202,314,000 in this country during their stay here, if an estimate published by the Dominion department of trade and commerce can be accepted as reasonably accurate.

This is an enormous revenue from such a source when it is remembered that the principal export industry of this agricultural country totalled in value \$156,153,857 in the same year, this being the value placed on Canadian exports of wheat and wheat flour for 1935 by the External Trade branch of the Dominion bureau of statistics.

Thus the tourist trade to Canada in 1935 was worth approximately \$46,000,000 more to the country than the principal exported agricultural commodity and, when it is pointed out that a substantial proportion of tourist expenditure means clear profit, the value of the traffic in comparison is greater than even appears on the surface.

But when one examines the comparative figures of income from tourist traffic by provinces it is immediately apparent that the share derived by the prairie provinces of this newly developed source of wealth is but a drop in the bucket compared with the income enjoyed by some of the eastern provinces and British Columbia from the same source.

For example, figures compiled by the Saskatchewan Motor Club show that on an average expenditure basis, varied according to length of time of their visit, American tourists entering the province direct through ports of entry on the contiguous section of the international boundary line spent approximately \$822,024 in Saskatchewan in 1935, to which is added another \$652,670 as the estimated expenditure of those who entered the country through Manitoba and Alberta ports and spent a portion of their time in Saskatchewan, making a total of \$1,474,714 as Saskatchewan's share of this new industry—if it may be called such—last year.

In other words all that Saskatchewan derived from this source of new wealth was less than one per cent. of the Dominion's total income from tourist traffic. Without going into further detailed figures it may be said that the tourist revenues accruing to Alberta and Manitoba for the same period were relatively commensurate.

There are certain factors responsible for British Columbia and some of the eastern provinces, and particularly Ontario and Quebec, securing the great bulk of this traffic. One of these is the fact that these provinces are relatively closer to the large American centres of population. This is the principal reason. Another is the greater proportion of paved roads on the Canadian side in these provinces directly linked with similar highways in the United States.

But even after allowing for the greater advantages enjoyed by those provinces mentioned, the fact still remains that the prairie provinces are not getting anything like their proper share of tourist traffic and that for them there are great potentialities yet undeveloped.

The relative scarcity of American tourists in the prairie provinces is partly a heritage of the comparatively recent days when visitors found it a frequent experience to have their cars bogged down in mud. Highways have been materially improved since that time but the stigma earned by prairie roads in those days has by no means been lived down yet. This coupled with the difficulty of financing maintenance of a great mileage of gravelled highways during the still more recent depression years has had the effect of keeping away from the prairie provinces a good many who would have come, but for the skepticism grounded on former experiences.

This is a handicap which has to be overcome before the three western provinces can expect to share in full measure the dividends of tourist traffic to which their natural advantages and beauties entitle them. This can only be done by taking the necessary steps to see that the network of highways already built is maintained in good condition and that as far as possible the dust nuisance of the gravelled highways is eliminated or at least mitigated to a minimum coupled with judicious advertising.

Has Modernized Turkey

People Owe Great Deal To President Of Republic

Mustapha Kemal Fasha, President of the Turkish Republic since 1923, has had eight attempts on his life in 15 years. He pays a servant £3,000 a year for working 30 minutes a day to taste his food before he eats it—in case of its being poisoned. Mustapha Kemal—known as "Grey Wolf"—has made Turkey a modern State. The Turkish army discarded the fez at his command, and he has altered women's veils, the Turkish calendar, and has thrown over dervishes. He has separated Church and State, established art schools where students work from living models. In Ankara, the capital, there are seven monuments of him. Mustapha Kemal is fond of dancing and gay company. He encourages the young folk in enjoying themselves. He is 56 years of age, the son of a minor official, and was educated at the Military College, Turkey.

A machine to hang wall paper has been invented in England.

A New Fire Extinguisher

Bomb That Puts Out Blaze Demonstrated In France

There has recently been demonstrated in France by its three inventors, Signor Redaelli and Signor Finzi of Italy and Herr Puschner of Austria, a bomb that kills fire.

The demonstration was arranged in collaboration with the Strasbourg Fire Brigade, which built some stage scenery houses and set them alight. They also lighted petrol and rubber. The new bombs killed all these fires, and aroused great enthusiasm.

The principle of the new bomb is like blowing out a candle on a vast scale; the force of the explosion put out the fire. The chemical substance they contain is quite harmless. It possesses the property of cooling the material it touches, and so prevents the debris from smouldering afterwards. The effect of these bombs on blazing petrol in the open air was amazing.

People of Germany are drinking more sparkling wine than before the World War.

Violent Deaths

Automobile Accidents, Suicides And Other Mishaps Take Heavy Toll

Automobile and other accidents, suicides and homicides brought death to 6,885 people in Canada last year, the Dominion Bureau of Statistics reported. Almost all forms of violent death except suicide showed increases over 1934 and crept up toward record high levels registered around 1930 and 1931.

Automobile mishaps took 1,224 lives or 11.2 per 100,000 of population compared with 1,115 in 1934. This was the largest toll since 1931 when 1,316 fatalities occurred.

In all, 6,885 persons or 62.9 per 100,000 met death from external violence in 1935. This, too, was the highest total since 1931 and compared with 6,469 in 1934.

Suicides accounted for 902 deaths, compared to 927 in 1934 and homicides for 153 compared with 142 in 1934.

All provinces with the exception of Prince Edward Island, New Brunswick, and Alberta showed a larger number of motor vehicle fatalities in 1935 than in the preceding year. Prince Edward Island, however, had two deaths as compared with five. New Brunswick 40 against 52, and Alberta 45 against 61.

Prince Edward Island had the lowest rate, 2.2 per 100,000 and Saskatchewan stood next with a rate of 4.1.

SELECTED RECIPES

MARSHMALLOW CHOCOLATE LOAF CAKE

3 squares unsweetened chocolate
¾ cup cold milk
2 cups flour
2 teaspoons Magic Baking Powder
½ teaspoon salt
¾ cup butter
1¼ cups sugar
8 eggs (yolks only)
1 teaspoon vanilla

In a double boiler put chocolate and milk, when melted stir until quite smooth—cool. Sift flour once, measure, add baking powder and salt, sift together three times. Cream butter, gradually add sugar and beat until light and fluffy. Add yolks which have been beaten until thick and lemon colored, and vanilla, then add flour mixture alternately with the cooled chocolate, a little at a time, beating well after each addition until smooth. Bake in a well greased pan in slow oven (235 degrees F.) for 25 minutes, increase heat slightly (to 350 degrees F.) and finish baking 45 minutes. Turn out carefully and while still warm cover bottom with marshmallows that have been rinsed off with cold water and cut in halves cross-wise. When cake is cool cover with chocolate frosting.

India Has Odd Bridge

A bridge across the Jhelum River in Kashmir is made of wickerwork. It consists of three ropes made of hazel twigs, one to walk on and the others to hold, the ropes being kept in position by V-shaped branches every six feet. Although appearing frail and swinging about in a gale, the bridge is really very strong.

The pirarucu, a fresh water fish, is found only in the Amazon river and its tributaries. Resembling a whale, it often weighs as much as 200 pounds.

Popping the Question!

Why don't you, too, get back to Ogden's Fine Cut? Times are better, and Ogden's is a better tobacco—the "one and only" choice of smokers who know that cigarettes rolled with Ogden's are the next best to "tailor-mades". Get yourself a package today—it's Cellophane-wrapped and has the purple easy-opening device. And make sure you use the best cigarette papers—"Chantecler" or "Vogue".

Invisible Light

Will Be Given By Lamps In Near Future Is Prediction

In the near future lamps will give "invisible" light. This forecast has been made by J. N. Waite, general manager of the Hull (England) Corporation Electrical Department. "Lamps will be able to give out not only visible light, but what we call 'invisible light,' he said. 'Scientists are still striving for increased beauty as well as increased efficiency.'"

Musical instruments used by the Chinese are drums, cymbals, horns, lutes, castanets and flutes. There are three varieties of bells—po-chung, te-chung and pien-chung.

Statistics reveal that for every three men aged between 75 and 80, there are four women. For every four men more than 85, there are seven women.

The Shetland Islands

Only 27 Out Of 100 In Group Are Inhabited

The Shetland group consists of 100 islands, 27 of which are inhabited. The largest are: Mainland, Yell, Unst, Fetlar, Bressay and Whalsay. The islands seldom rise to more than 500 feet above sea level. Much of the soil is peaty, and barely one-sixth is under cultivation. Cattle and sheep are grazed and the small, sturdy Shetland ponies and Shetland wool are well known. Fishing is one of the chief occupations and the whale industry is of importance. Originally settled by Norsemen, the island remained under Norse rule until the marriage of James III. of Scotland to Margaret, princess of Norway.

The tons of beeswax used in automobile manufacturing require the labors of 93,000,000 bees.

Warehouses at Calgary, Edmonton, Regina and Winnipeg

Enormous Increases In Productivity Of Soil With New Scientific Methods

Dr. O. W. Willcox has for some years been writing books about the new science of "Agrobiology," which makes possible enormous increases in productivity of the soil through new technical methods. Some of his predictions have been criticized, by Secretary Wallace among other people, as being excessive. Striking confirmation of Dr. Willcox's general theory now comes from California in the form of a report by Dr. W. F. Gericke, associate plant physiologist of the University of California. Dr. Gericke has been growing tomato plants fifteen feet high and tobacco twenty feet high. He has produced 217 tons of tomatoes per acre and has grown 2,465 bushels of potatoes—against a United States average at present of 116 bushels. Many other vegetables have responded similarly, and striking results have also been achieved with flowers.

Under Dr. Gericke's method, plants are not set into the earth at all. Shallow tanks are filled with a liquid composed of some ten chemicals, all of them readily available in commerce, and this liquid is heated by electricity or otherwise. Over the tanks is spread a wire screen covered with straw, excelsior or moss, in which the seeds are planted, thrusting their roots down into the liquid below. The growth takes place in unheated greenhouses or, in the proper season, out of doors. The products of this process are of high quality, and in the case of tobacco it is possible to avoid the rankness that sometimes accompanies rapid growth under natural conditions. That this plan is not a toy of the laboratory is shown by the fact that tomatoes produced under Dr. Gericke's method are now being sold on the California market, at normal prices and at a commercial profit.

Forty years ago, H. G. Wells wrote a scientific romance, "The Food of the Gods," in which he predicted a development of this sort, which changed the whole structure of society. He may yet live to see his prediction come true, for possibilities of these new agricultural techniques seem almost boundless. Already we are hearing stories of an occasional scientist who is said to grow a year's supply of potatoes for a large family in a tin pan under the kitchen table. It is possible to envisage all the vegetable foods for a huge New York apartment house being produced in a small space on the roof—unless, indeed, food became so cheap and so easy to produce that everyone moved to the country. There is as a matter of fact no especial reason why we should not have skyscraper farms, on which the rows of shallow pans would be stacked one above the other to a height of a hundred—or a thousand—feet, and reached by elevators. What such a development would do to 5,000,000 farm families, and to the millions of other persons who get their livelihood from the present agricultural economy, is a vista as exciting as it is terrifying. Certainly, the California experiments bring us one step nearer to that famous "economy of abundance," and make it still more absurd that millions of people should continue to go hungry.—New Republic.

Taking No Chances

Soviet Doctors Invent Gas-Proof Cradles For Babies

Gas-proof cradles for babies have been invented by a group of Soviet doctors and engineers working at the Moscow Sanitary Chemical Institute. Each cradle consists of a bag equipped with gas filters. The bag completely encloses the child and is joined by a tube to the mask worn by the mother. Her breathing draws purified air into the child's bag as well as her own mask.

"You" was formerly the second person plural, and was used with the plural verb in addressing a king. It corresponded to the kingly we. It is called a plural of courtesy, but now is in common use.

British Farmers Protest

Asking For Relief From Tithes Collected Under Queen Anne's Bounty

Farmers seeking relief from church tithes laid new demands before the British cabinet.

Over a three-mile course, a procession of 5,000 farmers wound through London streets tying up traffic and creating confusion during the rush hour. The protestants carried banners directed against "Queen Anne's Bounty," the royalties which were diverted from the crown to the Church of England in 1704.

"We shear sheep, the church shears us," some banners said. "Churchmen—be sportsmen. Pay for your religion," others read.

Some in the parade were dressed in Cromwellian uniforms, many in rustic dress. Women in sunbonnets and aprons marched beside the men.

After the procession many went to the House of Commons where they sought to interview their representatives on methods to halt payment of the land tax which takes \$11,000,000 annually from English agriculturists.

Originally, for the benefit of the crown, the farmers paid "the first fruits" and then one-tenth of each year's produce. The queen passed the royalties to the church for the benefit of poor curates.

Spread Bubonic Plague

Says Fleas Carry Germs By Hitch-Hiking On Rats

A story about fleas that spread the dread Bubonic plague by hitch-hiking their way around the world on the furry hides of foot-loose rats was told at Vancouver by Dr. Karl F. Meyer, San Francisco, professor of bacteriology at the University of California Medical School.

So great is the risk of epidemic that efforts will be made to have a corps of Canadian government inspectors stationed along the international boundary line to study the migrations of rodents into the Dominion, and begin a rat and flea survey to find any existing evidence of "imported" infection.

Addressing the western branch of the American Public Health Association, Dr. Meyer showed with motion pictures the control methods used in California a few years ago when the fleas gave the plague a firm foothold on this continent.

Subsequently they have transplanted the infection from California to Oregon, southern Washington, Idaho and Montana. Expressing fears that the fleas might reach British Columbia, Dr. J. W. McIntosh, medical health officer at Vancouver, said federal authorities at Ottawa should immediately institute a protective service.

Received Major Share

Biggest Part Of Advertising Is Done In Newspapers

Newspapers received the major share of national advertising expenditures in 1935, the bureau of advertising of the American Newspaper Publishers' Association announced in its annual survey.

The survey, based on a study of the advertising budgets of 387 companies, shows their combined expenditures of \$231,107,948 in the three principal mediums—newspapers, magazines and chain broadcasts—were apportioned as follows:

Newspapers—\$134,440,000 or 58.2 per cent.

Magazines—\$61,943,228 or 26.8 per cent.

Chain broadcast—\$34,724,720 or 15 per cent.

Twenty-two of the 33 trade groups listed in the survey favored newspapers over the other two mediums.

One alibi being as good as another, when King Edward VIII., as the Prince of Wales, declined his signature to autograph hounds, he always explained good-naturedly that "my hand's too tired." 2158

Dairy Industry Act Amendments

Important Changes Are Made In Regulations

The regulations under the Dairy Industry Act of Canada have been revised and renumbered, and the revised regulations are now in effect. The important changes are as follows:

Formerly packages containing butter were required to bear the registered number of the factory of origin unless the package contained print butter put up under the brand or trade mark of a wholesale or retail dealer who was not a manufacturer of butter. Under the new regulations, several methods of identification are legalized. Creamery or whey butter, cut as described in section 6, subsection (3) of the Act, if contained in a wrapper or carton, must bear on the wrapper or carton the name and address of the manufacturer, cutter, or jobber, or the name and address of the registered number of the creamery of origin, or the brand or trade mark of the wholesale or retail dealer.

Other important changes in the regulations are in connection with standards for grades of butter. Provision is made whereby butter containing more than two per cent. of salt will be placed in second grade, unless the butter is destined for a purchaser who requests over two per cent. of salt. First grade certificates issued for butter containing more than two per cent. of salt must bear the following notation—"As butter for which this certificate is issued contains more than two per cent. salt and is represented as being for a trade requiring more than two per cent. salt, a first grade certificate has been issued. This certificate is not valid for sale of the butter for either export or domestic trade except to a purchaser requesting a salt content of more than two per cent."

Heretofore, the showing of dates of manufacture on packages containing butter has been optional for domestic trade but compulsory for export. Under the revised regulations, all packages containing butter submitted for grading must bear the date of the manufacture of the butter. Copies of the complete text of the regulations may be obtained upon application to the Dairy and Cold Storage Commissioner, Dominion Department of Agriculture, Ottawa.

More Humane Trap

Has Been Designed To Replace Vicious Steel-Jawed Type

A flat chain trap which will replace the vicious steel-jawed type has been invented by Vernon Bailey, veteran naturalist and employee of the U.S. Biological Survey.

The trap has been designed in three sizes and will catch anything from a barn owl to a grizzly bear without hurting its prey, according to Bailey. To support his claims before an audience, Bailey placed his finger in the trap.

Canadian Commemorative Stamp Attracts Attention To Vastness Of Dominion

Facts About Wheat

Largest Wheat-Flour Exporting Countries Are Canada, U.S. And Australia

Canada's best market for wheat-flour is the British Isles; Australia's is the Far East. Wheat-flour exports from the United States are fairly well distributed throughout the world, but Japan's market for wheat-flour is confined to the Far East.

Production of wheat in India has often surpassed that of Canada, but India exports only a small proportion of her total output.

In 1928 the three largest wheat-flour exporting countries in the world were, in the order of their importance, the United States, Canada, and Australia. In 1935 this order was altered to Australia, Canada, and the United States, consequent on the 28 per cent. shrinkage of U.S. exports and the steady growth of Australian exports after 1930.

Russia has been a most uncertain factor in the world cereal situation, suddenly appearing as a larger exporter of wheat, barley and oats in 1930, and again in 1931, and then relapsing into a position of minor importance.

Except for two years between 1928 and 1934, Canada was the leading supplier of wheat to the British market. In 1929 Argentina, and in 1931 Russia, were at the head of the list.

In 1935 Canada supplied 70 per cent. of the wheat-flour imported by the British Isles. Australia, Italy, and France increased their exports of wheat-flour to the British market, but those of the United States and Argentina have declined.

Will Have Talkie Teachers

South African Schools To Be Provided With Films

Schools of South Africa are to have "talkie teachers" this year. Details of the plan are being completed by officials of the Union Education Department. Special positions are being created for the experts to carry out the new system. The films to be shown will not be for any specific subject; but will embrace the entire curriculum. They will be obtained from different countries. There will be films which have been graded for universities, films for high schools and those for primary schools. As soon as the project is working on a sound basis, it is understood, there is a distinct possibility that some of the films required for the schools will be produced in South Africa. Private enterprise is also expected to take a part in the making of the films in the Union.

Of all the postage stamps issued throughout the world since 1840, there is no single adhesive that is more interesting and more instructive than the special delivery designed by the Canadian government for the commemoration of the Confederation of 1867, says a writer in the New York World-Telegram. A complete set of stamps was issued in 1927, ranging in value from one cent to twelve cents, but it is the supplementary special delivery stamp that tells us so much about the country north of the United States.

The stamp as a whole represents the very spirit of Canada, for it embraces in its design five methods of transporting mail against a background of one of the greatest mountains in existence, viewed through a frame taken from a Gothic casement.

If we take the centre vignette and examine it carefully, we are faced with a visual demonstration of the country's vastness, for a land that employs these five dissimilar methods of mail transportation must indeed be great. In the foreground we see a horseman, racing across the prairie, representing the post riders who still deliver mail to scattered residents. It is interesting to note that the words "Canadian Mail" may be discerned on the post bag of this horseman. It is the smallest bit of engraving ever attempted on a postage stamp.

Just in front of the horseman there are the rails of steel over which is thundering a swift train. Beyond the rails may be seen a dog-sled mushing through banks and drifts of snow. This is, in many parts of Canada, still the only way which letters and packages can be delivered and primitive though it may seem, it is practical and serviceable.

Further to the right is depicted ocean liners, for the boast of Canada is that her ports on both the Atlantic and Pacific are visited by liners from every foreign country in the world to bring and take away millions of dollars' worth of merchandise each year.

Soaring high above these other four methods of transportation is one of Canada's air-liners, for although she is so vast in territorial expanse, Canada has adopted every modern invention and her airways are closely linked with those of our own country.

The background for this pageant of mail expedition is gracious Mount Assiniboine, the North American Matterhorn, one of the most impressive peaks in all America. The mountain itself stands about 45 miles southwest of Banff, in Kootenay National Park.

The delicate frame work which encases the entire vignette is taken from a window in the House of Parliament in Ottawa. For the Canadian people are conscious of the value of art. The words "Special" and "Exres" are evidence of the democracy of the Dominion, for, although under the English flag, the French inhabitants of the eastern provinces still retain their mother language; postage stamps and money are inscribed in their tongue for their convenience.

An Improved Speech

Lord Loughborough Had Nothing But Praise For Reporter

The complaint of the politician who finds his speech incorrectly reported by the press is generally long and bitter. Not so with Lord Loughborough.

Asked on one occasion whether he had really delivered a speech credited to him by a newspaper, Lord Loughborough replied: "Why, to be sure. There are many things in the report which I did say; and there are many more which I wish I had said." — Christian Science Monitor.

Visitor—"What an innocent-looking face your little girl has."

Mother—"I hadn't noticed it, Dorothy what have you been doing."

Take "Time Out" To Stitch These!

Household Arts by Alice Brooks

It's Fun to Embroider These

PATTERN 5549

Take "time out" to stitch these adorable pups, and you'll be well rewarded, for your family will be vying for their ownership long before pillow-top or picture is completed. Do these "doggy" likenesses in easy 6-to-the-inch cross stitch—a child could do it—using floss in soft tans and greys, with a bit of black floss to emphasize the twinkle in those mischievous eyes!

In pattern 5549 you will find a transfer pattern of these dogs 12 x 12 1/4 inches; a color chart and key; material requirements; illustrations of all stitches needed.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave., E., Winnipeg.

There is no Alice Brooks pattern book published

Everybody Pays Taxes

Who pays the taxes which provide the funds to run our federal, state, country and local government? More people are asking that question now than ever before, and more are waking up to the fact that the tax load falls on everybody, whether he is on the income-tax or property owners' list or not.

It is a favorite device of politicians to conceal the facts about taxation from the ordinary citizen. The result has been to deceive great numbers of poor folk into believing that they do not pay any part of the cost of the government, but are beneficiaries of the taxes imposed upon wealthy property owners and big corporations for the benefit of the poor. The truth probably is that, in proportion to their earnings, the poor and the moderately well-to-do pay a larger share of taxes than do the rich.

Where do the rich get the money with which to pay the taxes? Certainly from the consumers who buy their products or rent their property. The Guaranty Trust company of New York reports a recent survey showing that nearly 25 percent of all rents go to pay the landlord's taxes. The tenant paying \$20.00 a month rent, on that basis, is paying nearly \$60.00 a year in taxes. The landlord is a tax collector for the local government.

So, too, is the retail dealer an involuntary tax collector. The computation that every loaf of bread sold carries its share of 52 different taxes is not exaggerated. One common drug store item, milk of magnesia, was recently found to carry 270 different taxes, as paid by the drug store customer. Every article sold in a store has to help pay the storekeeper's taxes, the landlord's taxes and all of the taxes on doing business imposed by the governing units which have the power to levy taxes.

Every effort to reduce the cost of government will be futile until the mass of voters becomes tax conscious and becomes more watchful of those who spend the money.

Canada Year Book.

The publication of the 1936 edition of the Canada Year Book is announced by the General Statistics Branch of the Dominion Bureau of Statistics. The Canada Year Book is the official statistical annual of the country and contains a thoroughly up-to-date account of the natural resources of the Dominion and their development, the history of the country, its institutions, its demography, the different branches of production, trade, transportation, finance, education, etc. In brief, a comprehensive study within the limits of a single volume of the social and economic condition of the Dominion. This new edition has been thoroughly revised throughout and includes in all its chapters the latest information available up to date of going to press. It is illustrated by many maps and diagrams, and the latest available data are everywhere included.

The death of King George V. and the succession of King Edward VIII to the throne, have been appropriate-

ly marked by the reproduction as frontispiece, of the official proclamation of the government of Canada on January 21, 1936, accompanied by the latest court photographs obtained through the courtesy of the respective Court photographers.

Owing to the urgent need for economy in distribution of government publications, it has become necessary to make a charge to ALL individuals receiving the Year Book. Persons requiring the Year Book may obtain it from the King's Printer, Ottawa, as long as the supply lasts, at the price of \$1.50, which covers merely the cost of paper, printing and binding. By special concession, ministers of religion, bona fide students, and school teachers, may obtain paper-bound copies at a nominal price of 50c each.

Doings of Our Neighbors

At Olds: Mayor Bowman Campbell who left on a combined business and pleasure trip to Vancouver, is now in a hospital in that city suffering from a painful and serious bite of some insect. Robert seems to have tough luck when away from home. The last time he was away he was in an automobile smash up and was around on crutches for several weeks.

Chas. Hodges started work rebuilding his aeroplane hanger on Monday, after the storm had blown it down. The supports are going to be a little larger and better spaced this time, there might be another storm soon.

WEEKLY JOKE

Judge: "Then it's true that you struck your neighbor in the eye with your fist. Have you any explanation to make?"

Oysterpuff: "Yes, your honor. I'm so terribly near-sighted. I only wanted to beckon to him."

The Harrow That can Disc up to **100 Acres a Day!**

If you farm a large acreage, Oliver WDH Wide Disc Harrows can cut down your costs. With the 32-foot size, you can disc as high as 100 acres a day—and do that immense amount of work thoroughly.

The WDH is built in 14, 15, 16, 21, 24 and 32-foot widths to meet all conditions of soil, crop and power. Each section works independently of the others and that's why the WDH discs uneven ground so well.

If you farm in a big way—with either horses or tractor—you'll want to investigate the profit possibilities of Oliver Wide Disc Harrows carefully. They will do your harrowing up to the full limit of your power and produce a uniformly fine seed bed. Adjustable to any desired depth, you get even, deep discing every foot. Ask for details!

Softball.

Didsbury Flashes, local entry in the Provincial softball playoffs, had little trouble defeating Ghost Pine on Monday night in a game that was erratic throughout. The final score was 15-8. Errors by both teams were responsible for many unearned runs, but the locals made up for their mistakes by excelling at the bat. They collected 15 hits, two of them home runs by Tuggle and A. Krebs, and base running by Johnnie Tittsworth was well worth seeing. Ghost Pine were weak at third and shortstop, but with a little more practice will put up a much better game. The team is also entered in the playoffs.

Didsbury: Berscht, c; Tuggle, lf; Tittsworth, ss; Brightman, cf; Krebs, 3b; Bob Gulliver, 1b; Harold Gulliver, 2b; Shannon, rf; R. Holub, p, and Miller, sub.
Ghost Pine: J. McArthur, ss; S. McArthur, 1b; Trentham, 2b; Huxley, lf; G. King, 3b; Gribbin, c; Wollen, p; N. King, rf; Milan, cf.

Burnside Notes.

Don't forget the Big Baseball Tournament at Lone Pine Ball Grounds, Wednesday, August 5th. First game, Sunnyslope vs. Lone Pine, 1 p.m. 2nd Game, Didsbury vs. Torrington. Playoffs 6:30 p.m. Good prizes: 1st \$10.00, 2nd \$5.00 and losers \$2.50 each. Dance at night to Borbridge's Music.

Lone Pine Baseball Team journeyed to town last Wednesday evening and played the Didsbury team. The score was 5-2 in favor of Didsbury, quite the reverse of the game at Lone Pine a few weeks ago, when Lone Pine won 20-5. We'll be interested in seeing how the next game comes out.

Fred Metz and Earl Dedels spent Tuesday in Calgary.

Mrs. Walter Bittner spent Sunday with Mrs. Joe Clark.

Mrs. Agnes Patterson is spending a week with friends at Swallow.

Miss Marjorie Pross is visiting her sister, Mrs. Ted Bolton.

Mr. George Metz spent Thursday in Calgary and Gleichen.

Mr. and Mrs. Eckel were Tuesday business visitors in Olds.

Idris Jenkins is camping this week at Sylvan Lake with a party of friends.

Miss Florence Sharkner and Earl Dedels spent Sunday at the former's home near Sunnyslope.

Frank Doyle has been spending a couple of weeks with his uncle, Percy Saunders.

Mr. Ralph Long spent the weekend with Mr. and Mrs. Fred Thompson.

Miss Florence Sharkner is the new housekeeper at Mr. George Metz' home.

Bill McCulloch, Gus. Bittner, Fred Doll and Bill Wulawka were Sunday evening visitors at Mr. Noah Eckel's.

Mrs. Clarence Weal and Teddy are visiting the former's parents Mr. and Mrs. Fred Thompson.

Mrs. Fred Thompson, Reg Jamieson and Mrs. Charlie Welch of Calgary left on Wednesday on a two weeks motor trip to the coast.

Mr. and Mrs. Otto Bittner and Mr. Albert Spraggs were Sunday dinner visitors at Mr. and Mrs. Chris Ehret's.

Miss Tena McLean who has been visiting at her home here, went to Rochester where she has taken a position.

Mr. and Mrs. Jim Sheils, Annetta and Leslie are holidaying this week with their daughter, Mrs. Pack at Raymond.

We are pleased to say that Miss Pearl Liesemer, daughter of Mr. and Mrs. C. R. Liesemer, is making a satisfactory recovery following her operation in Didsbury Hospital last Saturday.

Baseball.

With Ray Stouffer and Mike Shuler pitching five-hit ball, coupled with heavy slugging by their team mates, Didsbury baseball team defeated Lone Pine 6-1 last Wednesday night in the first game played on the local diamond this year. The locals had little difficulty finding the offerings of Idris Jenkins and in the first four innings collected 10 hits for 4 runs. Bob Eckel took over mound duty in for Lone Pine and held the home boys scoreless until the seventh when Didsbury scored their last two runs.

It was a snappy game, with plenty of good fielding, and provided some real ball for the large crowd. Another game between these two teams will be well worth seeing.

Batteries

Lone Pine: I. Jenkins, Eckel and Faas.

"The Man They Could Not Hang"

Strange Case Caused Sensation
Owing to Many Thrilling
Episodes.

The furore that the Hauptman trial created was comparable only to the amazement caused throughout the entire world when it was learned that John Lee, convicted slayer of his aged employer, had been three times placed upon the scaffold, and that each time the trap had refused to work. The complete story of Lee's life, into which is woven a tale of undying love and a woman's noble sacrifice, is utilised in the talking picture, "The Man They Could Not Hang," which comes to the Opera House for one performance only on Wednesday evening, August 12, in conjunction with the personal appearance of W. Leonard Howe, stage, radio and film star, who presents an atmospheric prologue to the picture. A friend and confidant of Lee, he is able to recount many intimate details of his strange case, called by Liberty Magazine, "A Modern Miracle," where some unseen power apparently prevented the hanging of this man, for it is an interesting fact that John Lee lived on to hear the confession of another, and to be reunited to the woman who had patiently waited for him all the 23 years of his imprisonment.

IMPARTIAL AS LIGHT

YOU cannot argue with light. It just shows you things as they are. It plays no favorites. It gives brightness to the things that are already beautiful and it floods revealingly into the dark corners to show the dust and the grime and the hidden ugliness. If you guess at the nature and quality of things that are only half seen, if you see things that are not there, your eyes and your imagination are to blame. You cannot blame the light. For it can only illumine the aspects that are turned towards it.

NEWS is like light. It sheds a beam on men and events. It lifts the darkness from promotions and policies. It penetrates to hidden things and shows the truth as it is, for all to see.

THE news columns of a good newspaper are impartial. They tell the truth as it is found, they give all the facts that are known. The same news that guides its editorial opinions is there in full to inform your own judgments. It is the chiefest function of a reputable newspaper to bring everything of importance to the people into the daylight of publicity, discouraging vice and corruption and chicanery.

The independent newspapers of Southern Alberta shed the light of truth on the happenings and developments that interest you. Read them, confident in their integrity.

The Calgary Herald

Daily

WORLD HAPPENINGS BRIEFLY TOLD

Soviet Russia's blond "parachute beauty", Nadejda Babushkina, 20, died at Ioshkarole of injuries received in a jump.

An angry crowd of 3,000 stoned the automobile of Sir Oswald Mosely, leader of the British Fascist party, and smashed windows at the Fascist club at Hulme.

Even district court judges are not immune from court summonses. His Honor Judge Lucien Dubuc of Edmonton got one. He had failed to take out a license for his dog.

Robert A. Merritt, Jr., Winnipeg, was elected commander of the American Legion in Canada for the coming year, at the business session of a one-day convention in Windsor, Ont.

University of Manitoba students may study the Norse language and literature in future years. Addition of this course to the curriculum in the faculty of arts and science has been announced.

Rev. Brother Henry of the congregation of Christian Brothers, who started his 50 years of teaching at St. Brigid's, Ottawa, in 1886, died in Montreal at the age of 68. He had taught in Toronto and Yorkton, Sask., during his career.

The board of railway commissioners published a judgment granting application of the Brandon, Saskatchewan and Hudson Bay Railway company for permission to abandon operation of its line from Morden, Man., to the international boundary.

Three Saskatchewan nurses and one each from Alberta and Manitoba are listed among those who passed the May examination for nurse registration in Ontario, as required by the department of health. Saskatchewan nurses are Frances M. Adams, Estevan; Mae Brunelle and Julia Corkery, LaFleche.

Consideration For Workers

General Foods Gives Annual Vacations With Pay To Hourly-Rated Employees

Factory employees of General Foods in 31 plants in various parts of Canada and the United States, will enjoy from one to two weeks' vacations with pay this summer.

General Foods employees who have completed two years but less than five years of continuous service by July 1 of each year, and who have a record of regular attendance during the preceding calendar year, will get a week's vacation with pay during the current calendar year. Employees who have completed five years or more of continuous service will receive two weeks' vacation with pay.

The decision to reward General Foods' hourly-rated employees was made by the food company's plant managers. Announcement of the vacation plan was made by R. K. McIntosh, Vice-President, General Foods, Limited, Toronto.

"The purpose of this plan," Mr. McIntosh said, "is to provide annual vacations with pay for hourly-rated employees. It is a recognition of continuous service and regular attendance and of the value of a period of recreation from routine duties."

"Vacations with pay for factory employees is not an innovation in General Foods," Mr. McIntosh explained. "It has been the practice for many years in some units of the corporation to give vacations with pay on a limited basis. The newly announced program is a further step in a long established industrial relation policy of the corporation. It will liberalize the existing vacation plan and make vacations with pay available to all General Foods factory employees with two years of service."

Two years ago General Foods provided its employees with an old age retirement plan. A group insurance program, supported in part by the corporation, also is in force.

During the depression the corporation maintained a high average of employment, and since then General Foods has increased employment to what is now the highest in its history.

"Shorty", a mongrel dog, earns \$35 daily for his master by playing "fox" parts in moving pictures. Real trained foxes earn only a third as much.

A contemporary defines an amateur gardener as one who makes his beds and then lies about them.

British Aviation

Huge Sums To Be Spent In Developing Air Craft

The greatest financial year in Britain's history of aviation is just starting. Between now and next April more than \$132,500,000 will be spent on aviation alone.

Work, for the right man, is to be had for the asking. There are not enough men to fill the positions vacant. Every pilot with the right licenses has a post, every workman with skilled experience is drawing overtime pay, every designer with ideas is busy at a drawing board.

The largest order for civil aircraft ever placed has been gained for the new Imperial Airways machines—craft that will span the Atlantic, half times on the empire lanes.

More than 2,000 men are at work in the Rochester works of Short Brothers, finishing the first batch of flying boats for this order. Another 3,000 are making the engines for them. Hundreds more are making the land planes for this order at Armstrong-Whitworths. The order amounts to \$10,000,000.

The government is spending \$90,000,000 on the Royal Air Force expansion scheme. Every aircraft factory in the country is working to maximum capacity on this order. No more orders are being taken.

Settle Child Actor's Case

End Dispute Over Custody And Earnings Of Freddie Bartholomew

Judge Harry Archibald has approved an agreement ending the family dispute over the custody and earnings of Freddie Bartholomew, child screen actor.

The agreement gave the custody of the 12-year-old star to his aunt, Mylicent Mary Bartholomew, who has piloted his screen career from its beginning.

The boy's parents, Cecil Llewellyn Bartholomew and Lillian May Bartholomew, were awarded the right to visit him as often as they cared to so long as this did not interfere with his movie work.

The Union Bank and Trust Company was named as guardian of Freddie's estate and his earnings—unofficially estimated at \$1,250 weekly—were ordered distributed as follows:

Ten per cent. to the father, five per cent. each to his minor sisters, Eileen and Hilda, and the remainder to his own estate.

From the estate the expenses of the boy actor and his aunt will be paid. The residue will go towards building a fund for his education and future needs.

Less than 700,000 domestic servants in the United States live under the same roof with their employers.

Wider Markets

Says U.S. Policy Of Economic Isolation Will Never Bring Prosperity

What the United States needs is a complete readjustment of the economic policy we have pursued since the World War, wider markets for our own and our customers' goods, a wider field of endeavor for labor, a way found by which our foreign debtors can gradually liquidate their obligations to us. The policy of economic isolation if protracted for a million years could not in that time return work and prosperity to the people of the United States.

Under a policy of economic isolation, even if a man makes a profit more and more of that profit will have to be contributed to the government to provide subsistence for the unemployed. Under this policy we make it necessary for those who are working to support those who are not. The more trade we have the greater our prosperity and correspondingly less the tax burden. Less trade, less prosperity and higher taxes.—Senator Tydings of Maryland.

Mineral And Vitamins

Doctor Lists Things Every Child Should Eat Daily

What every child should eat daily to preserve the body's supply of minerals and vitamins was listed by Dr. F. F. Tisdall, of Toronto, at the Canadian Medical Association convention held in Victoria.

Dr. Tisdall specified from 25 to 30 ounces of milk, including milk used in cooking, which should be about one third of the total; eggs and meat in reasonable quantities; at least two vegetables besides potatoes, and some fruit or raw vegetable.

If the human body was getting enough mineral and vitamins, more would do no good.

Home Away From Home

Glasgow Prisons Are Made Comfortable For Favored Few

Prisons of Glasgow, Scotland, are to be just like a home away from home to a favored class of law breakers. The city will spend \$3,500 in making cells more comfortable with blankets, pillow slips, bolsters, rubber mattresses, collapsible tables and chair and other conveniences. Drunks will not be permitted to use them. Recently questions were raised in Parliament about the treatment of persons awaiting trial.

King Edward has sent to the local corporation at Birmingham, England, on permanent loan, the silver trowel with which he, as Prince of Wales, laid the foundation stone of the Hall of Memory.

Elevator Accidents Rare

When One Occurs It Usually Gets Into Headlines

On the 14th floor of Manhattan's Wurlitzer Building 15 men and women stepped out of a night school, started down in an elevator. As the car passed the twelfth floor, it picked up abnormal speed. The operator tried to check it with the control lever, failed. Instants later the car smashed into the spring buffers at the bottom of the pit, bounced up again, settled for good with its floor split, its walls and mechanism utterly demolished. Pounded into a screaming jumble on the floor were the passengers, all alive, but two with broken legs, others with sprained ankles, bruises. These injuries, which in train, ship, automobile or airplane wreck would not be considered unusual, caused headlines because they occurred on the world's greatest, safest, most reliable means of transport.

In New York City alone there are 41,470 elevators—more than the total of any continent except North America. Every day they travel 100,000 miles, lift and lower 15,000,000 passengers—twice the number carried by all other New York transport systems combined. Very rarely there is a brief delay through mechanical error. Much more rarely is there an accident. In 1934, last year for which figures are available, there were 96 elevator accidents in Manhattan. The ratio: one death for every 196,000,000 passengers; one injury for every 40,000,000.

For the U.S. as a whole, in 1934 there were 231 deaths from elevator accidents. Some were caused by fretful passengers jumping in or out too soon or late, or otherwise misbehaving. The rest were caused by carelessness on the part of operators.—From Time.

Canada's Military Forces

Figures Show What Is Being Done Toward Preparedness

At a time when there is considerable talk of rearmament and preparedness programs, it may be of interest to glance at what is being done in that direction in Canada. The following are from official sources:

There are 102 officers and 830 men in the Royal Canadian Navy.

There are 416 officers and 3,585 men in the Permanent Active Militia.

There are 147 officers and 884 men in the Royal Canadian Air Force.

There are 43 officers and 148 men in the Royal Canadian Naval Reserve.

There are 71 officers and 897 men in the Royal Canadian Naval Volunteer Reserve.

There are 6,883 officers and 41,873 men in the Non-Permanent Militia.

There are 52 officers and 289 men in the Non-Permanent Royal Canadian Air Force.—Niagara Falls Review.

Sea Monsters

Each Season Brings Its Own Story Of Some Fearsome Sea Serpent

There must exist subterranean monsters of which we have no knowledge, for periodically reports from outlandish places reach us of fearsome creatures. The latest is a description from Papua of a sea-serpent with long, curled tusks like those of a boar. If the natives can capture one, the New South Wales zoo will give the public the greatest sensation of the year. Some men were sent to lasso a specimen which sported near the shore, but it escaped. It was about 15 feet long, greyish in color, with a snake-like head, huge mouth, and pale stripes under the jaw. The same creature rose out of the water and poised itself to attack two fishermen, who frightened it away with shots, but not before they had noticed its vast round eyes and head.

"I suppose when you have been flying for a year or so it becomes second nature?"

"Surest thing you know. Why, I'm getting so that I often feel a craving for worms and bird seed."

People of England paid more than \$35,000,000 last year for clothing made in other countries. 2158

Employment In Canada

Upward Trend Is Indicated In Returns Made By Firms

Employment in Canada, as indicated by bureau of statistics returns from 9,690 firms, showed a gain of 23,295 persons on June 1 as compared with May 1, the bureau reported. In comparison with June, 1935, an increase of 47,721 was shown in the number employed.

This advance, while larger than the gain recorded during the month of May last year, was smaller than the average seasonal gain in the period from 1920 to the present.

The report showed 963,513 on the payrolls of the co-operating firms. Compared with 940,218 at the beginning of May and 915,792 on June 1, 1933, the index of employment on June 1 stood at 102.0 compared with 99.5 in the preceding month and 97.6 on June 1, 1935. The index is based on the year 1926 as 100 and at 102.0 stood at the highest figure for June 1 since 1931.

Improvement was reported in manufacturing, particularly in the food and lumber divisions. In the non-manufacturing industries, there were important increases in logging, mining, communications, transportation, highway and railway construction and maintenance, services and trade. On the other hand, building construction was not so active.

The trend was favorable in four of the five economic areas. Firms in the prairie provinces employed the greatest number of extra workers.

Construction (especially railroad construction and maintenance), transportation, manufacturing and trade showed improvement in the prairie provinces.

Stand By The League

General Smuts Enunciates The Position Of South Africa

General Jan Smuts, minister of justice in the Union of South Africa, said in a recent speech that it would be "sheerest lunacy" for South Africa to quarrel with Great Britain.

He said the union would stand by the League of Nations until the very end, agreeing with the views on the league expressed by Prime Minister J. B. M. Hertzog.

(South Africa has expressed her opposition to dropping sanctions against Italy for the Ethiopian conflict.)

"It would be sheerest lunacy to quarrel with England," General Smuts, a former prime minister, told an Afrikaner day meeting. "We do not possess a single ship able to ward off anti-aircraft carriers which could land enough planes on our shores to wipe out our large cities within a few hours."

"I am not referring to an imaginary danger but to a very real one. It is said we will be simply dragged into the next war in which England is involved but let me tell you that England knows South Africa wants to keep out of war, and also knows that South Africa has the right to decide her own course of action and the union will not declare war unless the people of South Africa through their own parliament have decided on that question."

Gen. Smuts said that South Africa constituted "an attractive bait for avaricious nations." He declared there was no doubt her position was becoming most dangerous.

Qualified For Prize

Italian Farm Handed Down In Family For 918 Years

Giuseppe Pierantoni, descendant of a family which has lived on the same farm for 918 years, has been awarded a prize by the Italian government. Records show that in 1018, when barbarians were still over-running the Italian peninsula, a peasant named Pierantoni reclaimed a plot of marshy land in Montelabate, which has remained with and been cultivated by his family ever since. Last year the "Fedelia Alla Terra" prize, as it is known, went to Antonio Gastellani, who, surrounded by his 19 children and grandchildren, was proved to be working the same land at Quericola, which his ancestors had worked for 709 years.

Not only does a bat have exceptional powers of sight at night, but fairly good vision in daylight.

Swagger Jacket "Takes You Places"

Household Arts by Alice Brooks

Summery Crochet Completes Every Ensemble

PATTERN 5653

A baby swagger, the smartest coat fashion of the season, is especially smart when done in crochet. Work one for yourself, of string or yarn—it's mainly in a simple stitch with plain crochet for cuff and collar bands. Make yourself a plain crocheted skirt, pattern 5353, and you'll have a complete suit.

In pattern 5653 you will find complete instructions for making the swagger jacket shown in sizes 16-18 and 38-40; an illustration of it and of all the stitches needed; material requirements. Price of pattern 20.

In pattern 5353 you will find complete instructions for making the skirt shown in sizes 16-18 and 38-40; an illustration of it and of the stitches needed; material requirements. Price of pattern 20.

To obtain these patterns send 20 cents each (40 cents for both) in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg News-paper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

"I never knew there was so much difference in mustard! I thought I was economizing when I got more of the cheap mustard for my money!"

"I've learned my lesson! It doesn't pay to waste good materials by using a substitute for Pure Mustard. I'll stick to KEEN'S D.S.F. MUSTARD."

Made from seed grown in the Fens of England. Shells or hulls are removed and only the inner part of the seed is used. Superfine grinding ensures the full mustard flavour.

In original tins for as little as 10¢

KEEN'S
D.S.F. Mustard

FLEMING'S FOLLY
— BY —
LAWRENCE A. KEATING

CHAPTER XIX.—Continued

His bullet ripped the weapon from the other's hand. With a hoarse cry Roper tried frantically to regain it. His bellow was that of a maddened animal as nerves sprayed pain over his arm and shoulder. Suddenly he abandoned the gun, stooped, snatched a fresh Colt from the holster Mell had not touched, and, gripping it, ran closer.

Link waited. A bullet had torn a hole in his trouser leg and perhaps had struck him, but he was conscious only of throbbing pain from his side and shoulder. As the rancher fired again, Link fired. His accuracy repeated; once more Roper Kilgo was disarmed!

The crowd uttered a long-drawn gasp, for still the man came on with heightening wolfish fury. The thirty feet that had separated Mell and Fleming now was entirely gone; Kilgo's thick frame hurtled through the air and his claw-like stubby hands shot for Link's wrist and throat.

They crashed, a swirling mass of writhing humanity. A cloud of dust rose so that spectators could not distinguish one from the other. Link's forty-five exploded. A well-placed blunt fist made it slither away in the dust. His antagonist whipped up a knee that grazed his groin. At the same time Roper abandoned his wrist hold and locked terrible viselike fingers on Link's throat.

His eye started from their sockets. His head went foggy and the world reeled, then seemed to blot out. A ringing set up in his ears and every muscle went watery weak. Hazily before his vision came again the bulldog jaw of Roper Kilgo. And with a supreme mobilization of strength in what he knew was his final blow, Fleming whipped his right arm back, crooking the elbow, then shot forth a terrific slam to the chin.

The fierce, bestial countenance before his sagged away. Dully Fleming heard knuckles meeting jawbone,

Why You Should Have It

1. Costs only 1/2¢ an hour to use
2. Lights instantly
3. Heats in a few seconds
4. Quickly ready for use
5. Maintains even heat
6. Hottest at the point
7. Irons with least effort
8. Saves 1/2 ironing time
9. No fire to build
10. No ashes to carry

Now you can iron in cool comfort in any part of the house... even outdoors beneath a shade tree. The Coleman iron is self-heating. No cords, no connections. Carry & use anywhere. Several models available at low prices. Ask your dealer or write us for free literature and details. The Coleman Lamp and Stove Co., Ltd. Dept. W317 Toronto, Ont.

felt that awful grip on his windpipe relax, felt black-rimmed fingernails scratching over his flesh. He crumpled to the ground as he slid into the yawning gulf of unconsciousness.

When again he opened his eyes they were stinging and heavy. The first face he made out was that of Helen Hamilton, and he knew she leaned over him, held his head out of the dust with a slender arm about his neck. Gratefully he gulped from a flat bottle she held to his lips, then sank back sighing.

There was a movement in the circle of bystanders and Sheriff Ames Stephen's grim face appeared. The lawman knelt. "Yuh gonna be all right?" Say, Link, I got news for yuh! Goshamighty, can yuh stand a terrible shock?"

Raw whisky was bringing his senses again under control and he stirred as if to rise. "The money!" he croaked. "Pay—Kilgo! Pieper—" "Yes! It's been done, Link! Otto brought the cash and I paid him. Oh, my dear!" Helen whispered, searching his wan countenance. "You—you'll be all right?"

He managed to nod. "Buzz?" he asked weakly. "The agreement?" "It's all arranged, Link. Buzz—" She halted, and the long silken lashes fluttered down. Her Stetson, saucily awry, exposed a mass of tumbling hazel hair that slid slowly downward over the girl's shoulder. "Buzz—got hurt. Roper tried to kill you, and—"

"Buzz interfered," came the vibrant voice of Waco Byrne. "He's in a bad way, Link." He glanced at the girl, who had drawn back and was staring dazedly at the ground. "In fact, Buzz got it. He's dead. But the kid did one heroic thing in his life anyhow. God rest his soul!" Byrne whispered fervently. "He saved yore life, son!"

There was a taut silence. As if remembering the news he brought, Sheriff Stephen bent again over Link. "Listen!" he commanded exultantly. "The dam! Fleming's Folly! She goin'!"

Link sat up with such suddenness that his forehead brushed the lawman's shoulder. "What?"

In a flash he was on his feet. His shoulder, he noticed, was tightly bandaged. "What'd you say?" he cried in a voice that cracked to weird falsetto notes. "What'd you say about the dam?"

"Hey!" bawled the sheriff. "Bring a hoss! Come on, Helen; we got to ride like hell. It's workin'! It's workin', I tell yuh! That damned dam's a-flooded an' workin', Link!"

Half an hour later, in the van of two score wildly shouting riders, Helen Hamilton, with her hair flying in the breeze, with her small booted feet firmly braced against the dashboard, urged speeding blacks to a wilder, faster pace. The Triple H spring buggy rattled and careened on two wheels. Thrumming hoofs were like the staccato rattle of a small boy's stick on the pickets of a fence. On all sides of them swarmed excited citizens of Rawhide, ranchers and ranch hands of western Boone County. A wide-eyed, breathless procession, every man with astonishment on his face, every quirt larruping the steed under him.

Fleming had one good hand with which to cling to the iron brace beside his seat. With glowing eyes he stared admiration for the girl beside him, driving like some recklessly expert charioteer of Roman days—if there were women charioteers! Now and again his look turned front, his eyes squinted hard and hopeful at the whiteness of Silver Creek Dam as it flashed rapidly closer.

On a hilly eminence he ventured to touch her smooth bronzed forearm. Helen glanced over, braced her feet harder, and slowly, deftly, drew the panting blacks to a halt. The horseback men split about them as steer split around a post, swerved right, and headed for the up-trail to McLendon's headquarters shack. But this, for the man and girl, was sufficient view of what they wanted to see.

A long moment they sat drinking in the scene. Far below them, in the smooth, vast hollow shaped like a half oyster shell, moving water gleamed in irrigation ditches that sprayed fan-like over twenty-six hundred acres. Rapidly, eagerly, glinting triumph in the sun, the precious moisture of Silver Creek

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas builds up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up." Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. 22c.

rippled and eddied in busy currents through the veins, of that fan, filling ditches, moistening for the first time the wasteland that no one would own. No one save Link Fleming and Helen Hamilton.

They did not speak for a full three minutes. Their eyes bright, they gulped in the awful beauty and significance of this thing they had brought to pass. At last the girl uttered a long sigh and relaxed in her seat. The spell of his fascination disturbed, Fleming turned for a look, and their eyes met.

"Fleming's Folly!" she whispered huskily. "Fleming's—Folly!"

He swallowed hard. There was an obdurate lump in his throat. Then Link reached out and wound her reins about the whip in its socket. He took her small shapely hands in his larger browned ones.

But there came interruption. A wild-eyed wiry little man with Stetson gone and thin hair tossing atop his shiny head, raced up on a diminutive mustang. He leaned hard on the reins and all but hurtled from his perch as the animal skidded on lowering haunches. He cupped his hands to them.

"Link! By Gawd, it works! Say, I'll give you a hundred an acre, spot cash! One hundred bucks, you an' Helen. Eh? We'll sign up right here!"

Fleming looked at her. They smiled. "Reckon not, Otto," he called back to the banker who was jerking his head from them to the fascination of the valley below, and back again. "But we'll keep our promise about the fifty acres for you."

"Hundred and twenty-five dollars, then? Hundred an' thirty-five? I'll buy it all! Eh? No? Look here, Link; I backed you, didn't I? Believed in this thing, didn't I? Give a hundred an' fifty an acre for any amount!" the Rawhide banker cried in desperation.

"Otto, I'll give you a tannin' if you don't turn that moth-eaten plug and mosey out of sight—pronto! Can't you see," Link complained, as he maneuvered to circle Helen Hamilton's shoulders with his good right arm, "Can't you see I'm busy making love?"

"What? You—?" Slowly he thrust away the check-book he had produced. A disgusted expression crossed his face. Otto Pieper took up his reins, clucked to his mount, and started reluctantly away.

Fifty yards distant he succumbed to a violent urge to glance around. But the banker jerked quickly front again, his lips screwed in the oval of one kissing. A soft, reflective gleam entered his shrewd grey eyes. Pieper grinned and shrugged his shoulders.

"Fleming's Folly. Huh!"

The End.

No Longer A Theory

Existence Of Spin Of Light Has Been Proved

The "spin" of light, that is, the twisting force of which its rays exert on anything solid, a scientist feat never done before, is announced by Dr. Richard A. Beth of the Worcester Polytechnic Institute, Massachusetts. The spin of light, or its angular momentum, means that each particle, or photon, of light is capable of spinning like a speeding rifle bullet. This spin had been only theory until Dr. Beth found a method of proving its existence and measuring it by training a beam of light on a circular quartz plate one inch in diameter and about three thousandths of an inch thick.

Sweden is adding \$2,000,000 to its defense costs. 2158

Anxious To Secure Organ

Brantford Historical Society Wants Instrument Now In Montreal

An antique barrel organ, more than 150 years old, sought by the Brantford Historical Society, has been discovered in the Indian room of the Chateau de Ramezay in Montreal.

Brantford historians are anxious to secure the organ for their museum because it was presented by King George III. to Chief Tayendaneaga, of the Six Nations, who became known as Joseph Brant, after whom the city of Brantford has been named. So anxious are they to gain possession of the music box that they have offered to even purchase it outright.

This is hardly possible, because the Chateau de Ramezay is not an antique shop where objects can be loaned or purchased, instead it is a haven for historical objects.

The Brantford parties will have to address their pleas to the Antiquarian and Numismatic Society of Montreal, and according to past records they are not considered generous in the habit of letting a valuable museum piece slip out of their hands.

The organ stands about two feet high and resembles more a modern humidifier or an electric ironer than a musical instrument. It is well preserved in spite of its age and while it has not rendered melodious tunes for more than a century, by pumping the bellows by hand, instead of using the handcrank, it is still possible to hear tunes, but these sound like the whistles of a locomotive.

The name of the maker is completely erased, and on the cover-board are the titles of 32 tunes and hymns, the name of which have not been heard since the 17th century.

Museum records show that the organ was presented to Chief Tayendaneaga or Joseph Brant by King George III., during his reign of 1760-1820. The reason for the presentation is unknown, but it is a known fact that the celebrated chief of the Six Mohawk Nations was highly educated and visited England on several occasions. He died in 1807 at the age of 65. There is a statue of him at Brantford.

The World's Progress

Has The Same Rate Of Advance Been Made In Every Field Of Endeavour

Whether the same rate of growth has been registered by the English-speaking peoples in every field of human endeavor between the Britannia and the Queen Mary is a question that needs further study. For example, a few months before the Britannia sailed from England there was published in that country a book called "Nicholas Nickleby." The year after the Britannia arrived here a first volume of essays was published by a man named Emerson. Obviously we must have better statistics than are now available before we can affirm that the two English-speaking nations today can easily turn out a couple of books from five to three hundred times as good.—New York Times.

Likes His Adopted Country

Native Of Holy Land Prefers Canada To Palestine

Louis Kassad prefers northern Victoria county even with its bleak, cold winters to his sunny native land of Palestine, he told newspapermen at North Sydney, Nova Scotia, when he returned from a visit to the Holy Land, his first in 40 years.

During his trip he visited many of the Biblical cities, saw relatives he had not seen since childhood and witnessed the first of the Arab-Jewish clashes. Back in Canada, he expressed his joy at returning to his adopted country.

She: "Oh, John, you are so extravagant."

He: "The dinner check was only \$10."

She: "But you gave the waiter 20 cents! I saw you."

The Tunguses of Siberia have no general name for the reindeer, although they have specific names for "tame reindeer," "wild reindeer," "young reindeer," etc.

Each pad will kill flies all day and every day for three weeks. 5 pads in each packet. 10 CENTS PER PACKET at Druggists, Grocers, General Stores. WHY PAY MORE? THE WILSON FLY PAD CO., Hamilton, Ont.

Little Helps For This Week

Behold I have refined thee, but not with silver, I have chosen thee in the furnace of affliction. Isaiah 48: 10.

Be patient suffering soul; I hear they cry. The trial fires may glow, but I am nigh. I see the silver and I will refine. Until My image shall upon it shine. Fear not for I am near, thy help to be; Greater than all thy pain, My love for thee.

God takes a thousand times more pains with us than an artist with his picture, by many touches of sorrow, and by many colors of circumstance, to bring man into the form which is the highest and noblest in His sight, if only we receive His gifts and myrrh in the right spirit. But when this cup is put away, and these feelings are stifled or unheeded, a greater injury is done to the soul than can ever be amended. What we should receive for our soul's good we may suffer to pass by us, and nothing comes of it. Then we come to the Lord and complain, and He tells us to open our heart to the pain which will do us more good than if we were always in the spirit of praise.

A Distinguished Veteran

Sir Percival Marling's Worst Moment Was Not On Battlefield

The late Sir Percival Marling, V.C., was one of three survivors who won that decoration in the first Sudan campaign. He also took part in the first Boer War, and, only three years before his death, revisited the scenes of his youthful battles in the Sudan as a young lieutenant. Amongst the famous warriors he encountered was Osman Digna, who was reputed a genuine centenarian when he died ten years ago after many false alarms. Five years ago Sir Percival published a most interesting book of recollections. From this it may be gathered that his worst moment was not on any stricken battlefield, but on a ceremonial occasion in the heart of London. He was the officer in charge of a mounted escort for Queen Victoria, and foam from his charger's mouth fell on the Queen's veil, necessitating mopping with energetic handkerchiefs by the Princess of Wales, afterwards Queen Alexandra, and the Ladies-in-Waiting. That contretemps brought a shattering look from the Queen and a peremptory order from the Horse Guards against officers' horses foaming at the mouth.

Grocer—"Well, little man, what can I do for you?"

Little Man—"Mother sent me to get change for a five dollar bill, and said she would give you the five dollars tomorrow."

Exclusive of the cost of the silver itself, it costs Uncle Sam only \$4.50 to turn out 1,000 dimes, \$7 for 1,000 half dollars and \$10.50 for 1,000 silver dollars.

ITCH

... STOPPED IN A MINUTE ... Are you tormented with the itching tortures of eczema, rashes, athlete's foot, eruptions, or other skin afflictions? For quick and happy relief, use cooling, antiseptic, liquid D. D. D. Prescription. Its gentle oils soothe the irritated skin. Clear, greaseless and stainless—dries fast. Stops the most intense itching instantly. A 35c trial bottle, at drug stores, proves it—or money back. 29

A Call to the Colors -

Drouth and crop tragedies dim the Alberta outlook,
but they only emphasize the need for policies which will
give more security and better returns to grain growers and
agriculture in general.

The cause of Agriculture must come FIRST, or collapse
will ensue. At all costs the agriculture of this Province and
the West must be protected. And included in the program
must be the PRICE PROTECTION, or the effort will fall
far short of what is needed.

The Alberta Wheat Pool asks the co-operation of ALL
grain growers in the continuation of the fight on behalf of a
BETTER DEAL for Western Agriculture. Patronage of
Pool Elevators is the very best method of helping along
this all-important cause.

ALBERTA POOL ELEVATORS

LISTEN—To the Alberta Pool Radio Program Every Sunday Evening
from 5:30 to 6 over the Foothill Network, CFAC, CJCA and CJOC—
commencing August 2nd.

Attention Everybody!

Here's a chance to earn
some money and adver-
tise your livestock, vege-
tables, cooking, and
fancywork—at the
OLD'S FAIR
to be held AUGUST 12th.

Town School.

Mr. and Mrs. Dunlop and son
Donald, who had been touring B.C.
and Idaho for the past three weeks,
returned home on Sunday.

Miss Wynne Studer and her guest
Miss Esther Campbell, of Calgary,
are spending their vacation at their
cottage at Sylvan Lake.

The Olds Fair is announced for
August 12. Besides the Exhibition
the attractions will be Horse Races,
Softball and Races for Children and
Grown-ups.

Miss Emily Wiseman, of Man-
chester, is visiting her aunt and
uncle, Rev. and Mrs. F. Vincett.
Miss Wiseman is making a tour of
Canada and the Eastern States.

Mr. and Mrs. J. A. McGhee, Mr.
and Mrs. Ivan Weber, Miss Lucille
Smith and Mr. Milt Ford comprised
a weekend fishing party. They
were successful in catching a fine
mess of grayling.

Mrs. Mel. Utterbach of Chelan,
Wash. with her daughter, Mrs. E.
Conklin and baby arrived Monday
night to visit at the home of Mrs.
Utterbach's parents, Mr. and Mrs.
M. B. Clemens.

We have a complete Line of Slat,
Webbing Rivets Buckles and Tacks
for repairing Binder Canvas—
T. E. Scott.

Miss Edith Waycott, of Calgary,
is a visitor with her uncle and aunt,
Mr. and Mrs. Erven Rodney.

Evening Service at Community
Hall next Sunday at 7:45. Speaker
will be Miss Vera Connolly.

George and Art. Boorman re-
turned on Sunday from a week of
holidaying at Gull Lake.

Didsbury Pioneer S.C. Group will
hold its next meeting at the home of
Mr. and Mrs. Otto Klein on Monday
at 8:30 p.m.

Mr. and Mrs. Percy Hosegood
entertained a large number of their
friends at the Elkton School on
Monday evening in honor of their
marriage.

About twenty ladies called on
Mrs. Devitt last Saturday to cele-
brate her 79th birthday. Tea was
served and an enjoyable afternoon
spent.

7x9 Colored \$1.50. Only one person
in photo. This offer for a short
time only.—J. Scrutton. (31p)

Mr. and Mrs. A. Orde and baby,
Mrs. Louie Holmes, Marion and
Doreen, Miss Joyce Jackson and
Mrs. Erven Rodney, spent the week
end at Sylvan Lake.

Mrs. J. Hughes and Mrs. R. A.
McFarlane, of Westcott W.I., and
Mrs. Hosegood and Mrs. Wahl, of
the Rugby W.I., attended Farm
Women's Week at the Olds School
of Agriculture.

Mr. and Mrs. Herbert Tittsworth
motored from Southern Kansas to
visit their sister and brother, Mrs.
Jesse Tuggle and Mr. John Titts-
worth. After the intense heat of
the south, they are delighted with
the cool nights of Alberta.

Cards of Thanks

Mrs. B. P. A. Dick and Family
take this means of expressing their
thanks and appreciation to all the
friends and relatives for the sym-
pathy shown them during their
recent sad bereavement.

We wish to thank our many
friends, especially our church
friends, for their sympathy and
many helpful acts of kindness
in the loss of our dear Celestine.

—Mr. P. Thompson
and the Spies Family.
